

New Product Introduction

A Reintroduction of the Original .357 MAGNUM®

The Model 27 in 3½- and 5-Inch Barrel Lengths

This is the model that founded the S&W MAGNUM® dynasty in 1935, and we're happy to be reintroducing two of the original barrel lengths. Preferred by many as an all-around revolver, this carbon steel version with adjustable rear sight, oversize Morado wood target stocks and traditional

fluted cylinder makes an excellent choice for home protection or hunting. Look for it at your Smith & Wesson distributor in February, but you'll want to order it in advance, since this will be available in a special production run of 1,500.
